

# Stop email chaos. Archive smart with MailStore Cloud.

Backups alone can't deliver compliance.  
Archiving reduces support pain, boosts revenue,  
and keeps data safe and accessible.

## Compliance that passes audits

Meet GDPR, GoBD, and other legislative requirements with secure, tamper-proof, audit-ready archiving that backups alone can't deliver.

**Data residency in Germany**

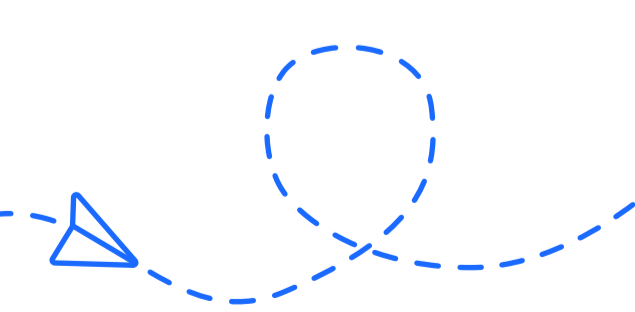

## Cut support tickets instantly

Empower users to search and restore their own emails, eliminating repetitive restore requests and freeing your team's time.

## New recurring revenue stream

Bundle archiving with Microsoft 365® or Google Workspace™ and OpenText™ Cloud-to-Cloud backup to grow predictable, high-margin monthly revenue with minimal overhead.
